ASTRAL · SP DATASERVE GAP ANALYSIS

What Astral is missing, in priority order

Every SP Dataserve feature, read against the Astral prototype and ranked on value and effort. These are gaps to test in customer discovery, not a list to copy. Scores are a desk view until customers move them.

Quick wins	Big bets	Fill-ins	Reconsider
11	3	17	4
Value 7+, effort 1 or 2 Do first	Value 7+, effort 3 Test in discovery, then plan	Value 6 or less, effort 1 or 2 Do when there is room	Value 6 or less, effort 3 Hold until discovery shows a need

#	ID	Gap	Reach	Freq.	Severity	Value	Effort	Confidence
QUICK WINS Do first								
1	C27	Say where times are UTC, and explain BST CUSTOMER	3	3	2	**8**	1	Medium. Data trust was named in Katie's walk
2	A2	Add and remove MPANs for a company ADMIN	3	2	3	**8**	2	Medium. Manual setup was named in V's walk
3	C22	Widen or narrow the date range from one end CUSTOMER	3	3	1	**7**	1	Low
4	C19	Help page and contact route, including MPAN requests CUSTOMER	3	1	3	**7**	1	Low
5	A8	Help content, contact details, and feedback in Inbox ADMIN	3	1	3	**7**	1	Low
6	C11	Consumption report with day and night units CUSTOMER	3	2	2	**7**	2	Low
7	C6	Totals per time-of-use band CUSTOMER	3	2	2	**7**	2	Low
8	A6	Keep site address, postcode, and site ID ADMIN	3	2	2	**7**	2	Low
9	C10	Site details in downloads CUSTOMER	3	2	2	**7**	2	Low
10	C18	IMSERV-raised queries and their steps. Confirm first CUSTOMER	3	2	2	**7**	2	Low
11	A3	Raise a query against a site, with steps. Confirm first ADMIN	3	2	2	**7**	2	Low
BIG BETS Test in discovery, then plan								
12	C16	Their own sub-groups of sites CUSTOMER	3	3	2	**8**	3	Low. Clashes with Group as access
13	C17	Bill Checker CUSTOMER	2	2	3	**7**	3	Low
14	A1	Tariffs and switching on Bill Checker ADMIN	2	2	3	**7**	3	Low
FILL-INS Do when there is room								
15	C15	Load factor and maximum kVA in the summary CUSTOMER	2	3	1	**6**	1	Low
16	C3	Direction column in Source data CUSTOMER	2	2	2	**6**	1	Low
17	C13	Compare statistics table CUSTOMER	2	2	2	**6**	2	Low
18	C12	Carbon report by month or year to date CUSTOMER	2	2	2	**6**	2	Low
19	C7	Register reads on screen, and reads sent to the supplier CUSTOMER	2	2	2	**6**	2	Low
20	C20	Service notices CUSTOMER	3	1	2	**6**	2	Low
21	A4	Post service notices ADMIN	3	1	2	**6**	2	Low
22	C5	kW column in downloads CUSTOMER	2	2	1	**5**	1	Low
23	C21	Feedback route CUSTOMER	3	1	1	**5**	1	Low
24	C26	Print or copy a chart CUSTOMER	2	2	1	**5**	1	Low
25	C4	Reactive import (RI) in downloads CUSTOMER	1	2	2	**5**	2	Low
26	C2	One view of AI, AE, RI, and RE CUSTOMER	1	2	2	**5**	2	Low
27	C23	Day-by-day half-hour comparison CUSTOMER	2	2	1	**5**	2	Low
28	C8	Leave quality flags out of a download CUSTOMER	1	2	1	**4**	1	Low
29	C24	Choice of decimal places CUSTOMER	1	2	1	**4**	1	Low
30	C14	Compare different sites over different dates CUSTOMER	1	1	2	**4**	2	Low
31	C25	Rows and columns switch for spreadsheets CUSTOMER	1	1	1	**3**	1	Low
RECONSIDER Hold until discovery shows a need								
32	C1	Reactive export (RE) data CUSTOMER	1	2	3	**6**	3	Low. Generation sites only
33	A7	Reactive and export channels per meter ADMIN	1	2	3	**6**	3	Low
34	C9	Consolidate by MPAN, and include MSID CUSTOMER	1	2	2	**5**	3	Low
35	A5	MSIDs and more than one meter per MPAN ADMIN	1	2	2	**5**	3	Low

Value is reach + frequency + severity, each 1 to 3. Reach is how many of the four user groups it affects. Severity is how badly its absence blocks the task. **Effort** 1 is a column or copy, 2 a new view or report, 3 a new data model or back-office process.

Admin items take the value of the customer gaps they unblock. Do the admin item first, such as A2 before C19. Confidence is low unless an internal walk named the problem. Full analysis in the Work Desk: SP Dataserve against Astral.
