Presentation Templates

IMSERV brand record
October 2026

How to Use This Record

What is here

- Seven template families from the Brand team's Presentation Templates folder, rebuilt as code.
- 26 layouts, each with its skins: photo, cyan, paper and ink.
- Every page notes what the layout is for, when to avoid it and its measurements.

How to pick a page

- Start from the message, not the look. One idea per slide.
- Use the chooser on the next page to match your content to a layout.
- Keep a deck to one or two skins, plus photo titles and dividers.

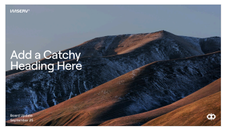

House rules

- 40 px inset on every edge, 40 px gutters, 128 px grid.
- Roobert only: Medium for headings, Regular for text.
- Cyan is a fill, never a type colour on white.
- Photos come from the brand library. No stock faces.
